

Question 2

.1

2.

```
(define arg 0)
```

```
(define foo
```

```
  (lambda (goo)
```

```
    (let((return 0))
```

```
      (lambda (arg)
```

```
        (set! return (goo arg)) return )
```

```
      )
```

```
    )
```

```
)
```

```
(define oddball (foo (lambda (y) (+ y arg))))
```

```
(oddball 5)
```
